## Assembly instructions for MotoShot 3D Target Dropper

### 3D Dropper Target System as received includes:

1. Positionable stand
2. Installed Fall Bracket
3. Installed Hit Count Shot Sensor

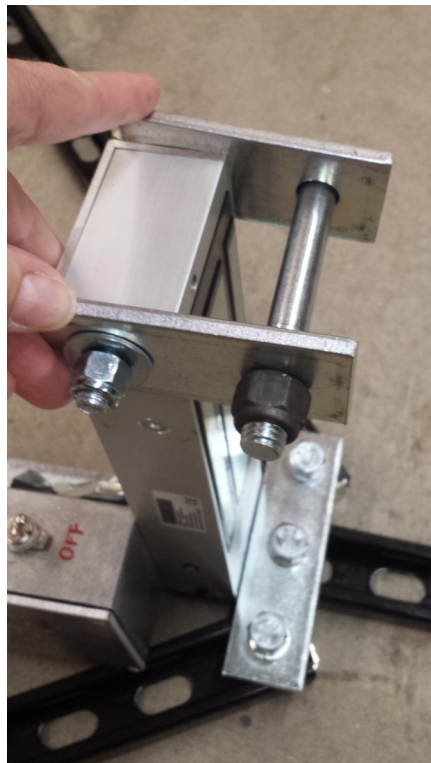

### Additional installation is required for the:

1. Target Post to Cantilever Mount
2. Rechargeable Battery
3. 3D Target
4. Hit Count Sensor

### Installation of the Target Post:

1. Remove 1/2" lock nut and bolt
2. Position target post so that the metal armature is facing the magnet
3. Reinstall 1/2" bolt through predrilled hole in the wood post, as shown.
4. Tighten 1/2 lock nut but not too tight that the magnet becomes pinched.

### Installation of Rechargeable Battery:

1. Slide battery into U-bracket holder and tighten wing nuts.
2. Plug battery into 3 prong wire harness

Always turn the systems off when not in use.

If you have any questions on how to assemble your MotoShot 3D Target Dropper please contact Hale Outdoor Products, LLC at 1-866-580-4284 or at [customerservice@motoshot.com](mailto:customerservice@motoshot.com).

## Assembly instructions for MotoShot 3D Target Dropper

### To Operate MotoShot 3D Target Dropper:

1. Mount hit sensor to torso on either the back or sides
2. Turn system "ON"
3. Set hit count to zero.  
This is the reset & magnet will stay locked until hit count is set.
4. Align armature post to the magnet, a green ready light will show.
5. Set desired hit count by turning the dial clockwise, each click is a "hit".

### Always disconnect battery after use and prior to storage.

Shown here with optional static post and additional target for hostage scenario.

Shown here with optional armor guard and foam threat

### **CONTROLLED FALL**

Shown here with the "Controlled Fall" bracket in place. Insert the 1/2 X 4" bolt pin through the post. When you would like the target to fall uncontrolled simply remove the "pin".
