- **300 YD** · Wireless range
- **RECHARGEABLE** · Battery + charger included

300 YD	4 FACINGS	2 MODES
Wireless Range	*Per Paired Set*	*Simultaneous or Independent Threats*

TRAINING USE CASES

1. **Shoot / no-shoot decisions**
   Turn between threat and no-threat at the last second — force proper target ID under stress.
2. **Force-on-force & Simunition**
   Set the Orbit downrange, run a threshold drill, control the threat from any firing point.
3. **Low-light decision training**
   Trigger the turn from the firing line — no one needs to be downrange in low light.
4. **Hostage rescue precision**
   The edge-on profile demands clean shot placement the instant the target turns.
5. **Rifle qualification**
   Covers the standard two-target qual course; doubles as the daily training rig.
6. **Multi-officer drills**
   Run team scenarios from any firing point — operator controls the threat wirelessly from cover.

SYSTEM HIGHLIGHTS

- **WIRELESS CONTROL**
  Hand-held remote out to 300 yd — run the drill from cover or the line.
- **BI-DIRECTIONAL PAIR**
  One set = two turners, four facings — threat on one face, no-threat on the other.
- **ADD AS YOU GROW**
  Pair as many sets as the range needs; one remote runs them all.
- **TWO DEPLOY MODES**
  Paired for simultaneous threats, or split into two standalones for independent threats — each with its own battery, no tether.
- **FAST TARGET SWAP**
  Wood-post mounts swap silhouettes in seconds — no tools, no down time.
- **RECHARGEABLE**
  Rechargeable batteries on the system and the remote — chargers included for both.

> *"The threat moves and the officer moves at the same time, constantly — so their brain isn't always seeing the same little picture every time.*
